

Hannah Arendt: A Life in Dark Times

Hannah Arendt was a German-American political theorist, philosopher, and historian. She is best known for her work on totalitarianism, the nature of evil, and the human condition. Arendt was born in Hanover, Germany, in 1906. She studied philosophy at the University of Marburg and the University of Heidelberg. In 1933, she was forced to flee Germany after the Nazis came to power. She went to Paris, where she worked as a journalist and political activist. In 1941, she fled to the United States, where she became a citizen in 1951.

Arendt's work has been widely influential in political science, philosophy, and history. Her most famous work, *The Origins of Totalitarianism*, was published in 1951. In this book, Arendt argues that totalitarianism is a new form of government that is characterized by its use of terror and propaganda to control the population. She also argues that totalitarianism is a product of modern technology and the rise of the mass society.
